# Introductory

---

The present volume constitutes the 1927 edition of Henderson's Directory of Edmonton. The work embodies a complete epitome of the civic, commercial, social and industrial interests and activities of the municipality. It is a modern Directory in all its parts and includes all the essential features which have been proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory, thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

THE DEPARTMENT OF MISCELLANEOUS INFORMATION is included in pages 25 to 56 and contains data concerning City, Provincial and Federal Government offices, commercial organizations, cemeteries, churches (denominational and miscellaneous), colleges and schools, hospitals, homes and asylums, building exchange and associations, institute and societies, libraries, military organizations, public schools, secret societies, etc.

THE STREET AND AVENUE GUIDE is embraced in pages 57 to 224; in this feature the names of all streets and avenues are arranged alphabetically, giving the location, number on the street and showing the occupant.

The intersecting streets are shown in the order that they come.

THE ADVERTISING occupies pages 1 to 24; this section of the Directory, printed on colored paper, includes numerous advertisements of the leading manufacturing, business and professional interests. A casual perusal of these advertisements will picture many interesting phases of the city's activities. They are not display advertisements, primarily, however, but rather are reference advertising at its best. The need for this kind of information readily at hand is very great, and the general appreciation of this need is evidenced by the liberal patronage the City Directory enjoys in many and varied lines of trade.

THE ALPHABETICAL LIST OF NAMES of citizens, business firms and corporations covers pages 225 to 581.

THE CLASSIFIED BUSINESS DIRECTORY occupies pages 585 to 640 and exhibits the various manufacturing, mercantile and professional names, compiled under headings appropriate to the class of industry or profession followed.

## ADVERTISING EDMONTON

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, where they are readily available for reference use by the public. There they serve as perpetual advertisements of Edmonton, for business men in the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

The Directory estimate of population is based on the actual number of names contained in the book, which is multiplied by a common multiple to allow for the married women and small children whose names do not appear.

Based upon the names contained in the pages of this book, it is estimated that the population of Greater Edmonton is 78,580. This includes considerable territory beyond the city limits, which is canvassed in order that the names of all people doing business in Edmonton may be obtained for the Directory.

Respectfully, The Publishers,

HENDERSON DIRECTORIES ALBERTA, LIMITED.

July, 1927.

# Edmonton

Edmonton, the Capital of Alberta, is located on the North Saskatchewan River, about two hundred miles east of the Rocky Mountains. At this point the river is flanked by high banks covered with spruce and poplar, or by broad open flats which provide splendid sites for parks and recreation grounds. The situation is ideal from the standpoint of landscape beauty, and as wealth and population increase Edmonton will rank as one of the beautiful cities of North America.

Edmonton holds the key position geographically to about one-quarter of the area of Canada, comprising the Valleys of the Saskatchewan, Peace, Athabasca and Mackenzie Rivers, and the great hinterland of North-West Canada. The extension of the Canadian National Railways to Prince Rupert has added Northern British Columbia to this area, as well as giving a short route for the products of the Prairies to the Yukon.

In the days of the fur trade many posts were built along the Saskatchewan River. Edmonton alone has survived and is developing into a great commercial metropolis because it is a natural trading centre. Ninety-five wholesale and jobbing houses are at present engaged in the distributing trade of the city. Its strategic position in Western Canada becomes more and more apparent as the city and the great territory it serves develops.

It is the meeting point of three trans-continental lines of railway, and the most important railroad centre on the Canadian National Railway System between the Great Lakes and the Pacific Ocean. There are over 1,800 Canadian National Railway employees who make their homes in the city. The annual payroll for these employees is over two and one-half million dollars.

Edmonton, lies opposite the lowest pass through the Rocky Mountains on the continent, and thus will draw through its gates the greater portion of the trade between Alberta and British Columbia, two of the richest provinces in Canada in natural resources.

The vast supplies of raw materials of the territory surrounding Edmonton form a basis for extensive manufacturing industries. The cost of living will always be reasonable because of the great production of foodstuffs: wheat, flour, meats, fish, poultry, eggs, butter, cream, cheese, milk and vegetables.

Edmonton is the centre of a great coal industry. Some forty-five coal mines are in operation within a radius of fifty miles of the city, several being within the city limits. The number of men employed in the various seasons of the year is over 1,400, and the annual production about one-and-one-half million tons. The payroll aggregates about two-and-one-half million dollars per year.

Beyond Edmonton, but well within its trading radius, lie the wonderful bituminous mines of the Mountain Park, Jasper and Yellowhead fields, producing

annually about two million tons of high-grade steam coal, and employing over 1,200 men. The market for these coals is steadily growing, and Alberta coal is displacing American coal in Eastern markets.

Edmonton lies on the edge of one of the greatest natural gas fields in America. The field extends in a broad zone from the Peace River, northwest of Edmonton, in a southeasterly direction across the Province to the Battle River, and beyond to the inter-provincial boundary, a distance of over 300 miles. The city is supplied with gas from the Viking-Wainwright portion of this field, which lies about eighty miles east of Edmonton.

The Northwestern Utilities Company, Ltd., has constructed a pipe line from this field to the city. The Company has nine producing wells completed, with a tenth nearly completed. The estimated flow per well being 4,000,000 cubic feet per day, with a rock pressure of 715 lbs. The area of the wells in question extends to 27 square miles, which ensures a gas supply ample for the requirements of the city for at least a period of twenty years. Additional to this area, however, known as the Viking area, there is a further region known as the Fabyan, 30 miles south of the Viking area, which promises to prove a still larger gas reservoir, so that the future supply of gas for the city seems absolutely assured.

While the aim of the Company is primarily to cater to the domestic consumer, to whom the use of gas appeals, it is anticipated that the supply is of such adequate proportions that manufacturing concerns will largely benefit by the use of the gas supply, the rate for which, though at present fixed at 30 cents per thousand cubic feet, may subsequently be reduced so that the larger manufacturers may take advantage of the utility. Within the city the gas will be distributed from mains extending to seventy-five miles. The domestic rate is fixed for the present at 46½ cents per thousand cubic feet.

In the Edmonton Timber Agency there are twenty-seven sawmills operating under license and ninety-five small portable sawmills under permit. The annual lumber cut in the city is about thirty million feet. On the west side of the Rocky Mountains, in British Columbia, a territory tributary to Edmonton, the log cut is about the same as in Alberta. In addition, there is a regular winter industry of cutting railway ties, lath, shingles and mine props, which gives the homesteader an opportunity of earning extra money. The complement of the lumber industry is found in several woodworking factories, manufacturing sashes and doors, dressed lumber, and other building supplies. Two box factories in Edmonton do a flourishing business.

The clays and shales of the District make excellent brick and tile. Several brick factories in the City and vicinity are being developed as the needs of

urban and rural settlement require. West of Edmonton, at Marlboro, cement is made and finds a ready market in the city and throughout the Province. Some of the clays are very suitable for pottery and other ceramic products.

The Edmonton Stock Yards handled 270,000 hogs; 102,000 cattle and 15,000 sheep last year. Total value of livestock handled \$3,000,000.

Flour milling was the first industry in Edmonton. It still holds an important place and has a prosperous future, particularly as a result of the coming development of the Western Grain Route. The manufacture of several cereals and mill feeds is beginning with prospects of becoming a considerable industry.

The packing industry began in a modest way over twenty years ago, and the pioneer firm, Gainers Limited, has made substantial progress commensurate with the growth of the live stock industry. In 1907 the Swift Canadian Co., Ltd., a branch of Swift & Company, of Chicago, established the first big packing house in Edmonton. A few years later P. Burns & Co., Ltd., the great pioneer packing house of Alberta, followed.

These industries employ about eight hundred hands, and provide a market for thousands of cattle, sheep and hogs each year. The three packing plants have doubled their capacity and output the last ten years. Edmonton is well situated for this industry, and a great expansion is inevitable.

During the last few years many new industries have sprung up in the city because of the ready supplies of raw materials, and because of the local demand created by a city and district of 400,000 people, and the possibility of meeting that demand by local enterprise and capital. Prominent examples are the manufacture of men's heavy clothing, women's and children's wear, iron, steel and sheet metal products, fence wire, furnaces, drugs, chemicals, brooms, cigars, soaps, candies, beverages, fur garments, boats and canoes. The success that has attended the establishment of these industries indicates the possibilities of industrial expansion in the City of Edmonton. The vast stores of coal and natural gas so easily available hold the possibilities of cheap power for manufacturing industries as well as the possibilities of several new industries growing out of the numerous by-products of the Edmonton coals. As the population of Edmonton and the rich district surrounding it increases, manufacturing opportunities will expand to meet the needs of a highly progressive community. Man-power and money-power applied to the natural wealth of Central Alberta will transform the province into a great industrial area equal to any other on the American Continent.

There are at the present time about 120 factories, large and small, which are all now and industries on a permanent and successful basis. The next ten years will be much more favorable to the establishment of manufacturers in the district than in any previous period. A factor to be considered in this connection is that the population of Edmonton includes many people from the Old Country who are industrially trained, workers in new industries. By

the last available Dominion census the number of industrial employees in the city is placed at over 4,200, and the annual output of manufactured goods is valued at \$32,000,000.

Edmonton is the seat of the Provincial University. The registration for 1922 in this institution was over 1,400 students. Degrees are granted in arts, science, agriculture, engineering, medicine, pharmacy, law and commerce.

There are over forty-eight Protestant public schools and eleven Roman Catholic separate schools, four high schools and the Technical high school. The school population has doubled since 1913, and is now 14,580. At the present rate of growth the School Board of Edmonton must build a new eight or ten roomed school every year. Other educational institutions that illustrate the importance of Edmonton as a centre of learning are Alberta Theological College, Methodist; St. John's Oblate College and Edmonton Jesuit College. For young women there are Westminster Ladies' College, Alberta College South, and four Roman Catholic Convents. Business and commercial training are given by the Commercial High School (part of the public school system) and three business colleges.

Men's and women's clubs are represented by the various forms of organizations found in modern cities of the continent. Sports of various kinds are well organized. Of winter sports hockey is the most popular. There are literally scores of amateur hockey clubs in different parts of the city. Curling and skating rinks are found in every section of the city. Ski-ing, snowshoeing and tobogganing afford exhilarating and healthful exercise. The popularity of winter sports is the best testimony of our splendid winter climate. Tennis, soccer and baseball are the most popular games in summer. There are three golf courses in the city, and the game has taken a firm hold. Lawn bowling is growing in favor.

Basketball is popular, and the commercial Graduates, all past students of the Commercial High School, hold the championship of the world in basketball.

There are over eight hundred acres of public parks situated in different parts of the city, as well as several excellent children's playgrounds. Two of these parks are provided with splendid swimming pools, which afford delightful recreation daily to hundreds of adults and children. The average attendance for the season is 1,600 a day in each pool. A third pool is conveniently located in the West End residential district.

Several lakes in the vicinity of Edmonton provide excellent summer resorts and are easily reached by motor or by train. Summer tourists will find a camp site conveniently situated within the city.

The water supply is taken from the North Saskatchewan River, through two 36-inch intakes into the pump station on the north bank of the river. At the pump station there are two six-million gallons and one eighteen-million gallons low lift centrifugal steam-driven pumps, one six-million steam-driven centrifugal high lift pump, and two ten-million electric high-lift pumps.

The pressure on the higher street level is from 40 to 45 pounds and on the lower river flats from 95 to 100 pounds, while at the pump station from 105 to 110 pounds is maintained. The pressure for fire-fighting is raised by the Fire Departments's own booster equipment.

The Filter Plant comprises sixteen Roberts Gravity filters of one-half millions gallons each, the sedimentation basin and two clear water basins.

The system stands capitalized at \$2,405,701.00, the annual revenue for 1920 amounting to \$429,141.00.

Today the system is comprised of 167 miles of 4-inch to 30-inch water mains,

11,729 water services, 813 fire hydrants. About 400 new services are being added each year.

The daily consumption of water averages 6,215,000 gallons, or a per capita consumption for all purposes of 95 gallons per 24 hours.

The Department is managed by a superintendent and office staff of 14, with offices on the second floor of the Civic Block, and an outside construction and maintenance gang under a general foreman.

About 80 per cent. of the services are on meter, the following tariff as revised being in effect on April 15th, 1921.

## Edmonton Street and Avenue Directory

### for 1927

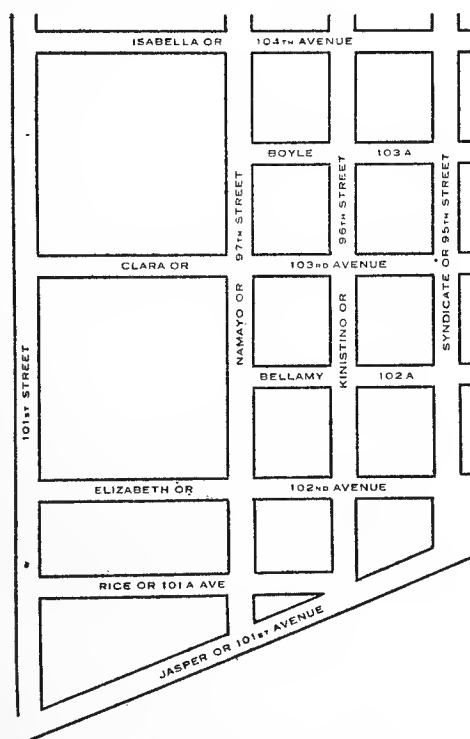

#### All Numerical System of Street Naming and House Numbering Plan

Streets run North and South, odd numbers South side ; Avenues run East and West, odd numbers East side.

Streets are numbered from the East. Avenues are numbered from the South. Old 1st Street is 101st Street. Jasper Avenue is 101st Avenue.

Short avenues and short streets have an A number.

The East and South have the small numbers. The North and West parts have large numbers.

The original names of the following Avenues and Streets have been retained in this issue of the Directory: Jasper Ave., Main St., Stony Plain Road, St. Albert Road, Fort Road Saskatchewan Drive and a few lesser known streets.

#### Examples House Numbering

1. 10312 on 96th Street. 12 is the house number as it is the last two figures. 103 is the First Avenue south of that block on 96th Street.

2. 10348 on 95th Street. 48 is the house number, 103 is the Avenue south, 95th Street.

3. 9624 on 102nd Avenue. House No. 24, 96th Street is the first street east of that house. The house is between 96th and 97th Streets.

**NOTE**—The arrangement of the following Street and Avenue Directory is in numerical order, with avenues preceding streets. Avenues and streets not numerically named appear first in Alphabetical Order. The arrangement by directions is East, West, South and North.

Where the odd and even numbers on an Avenue or Street are separated the South Side (odd numbers) on Avenues appear first, and the East Side (odd numbers) appear first on Streets.

7. Policy Contracts that are easily understood.
8. A Sure Accumulation of Money by means of Commercial Life Gold Bonds.
9. All plans of Life Insurance including the Monthly Income Disability and Double Indemnity features.
10. Financial Strength—The Commercial Life has a Dominion Charter and a Dominion License, and maintains the strong Reserves required by the Dominion Insurance Act. Never has a Policyholder of a Company with a Dominion Charter and License found his policy insecure. The Commercial Life is as Sound as the Dominion.
